

Gould Syndrome Foundation (COL4A1/COL4A2) **DRUG AVOIDANCE LIST**

AVOIDNon-Steroidal Anti-Inflammatory Drugs (NSAIDs) Please print and keep a copy of this page in your medical file. Be sure to tell all treating Physicians, Surgeons, Dentists, Medical Team, Comprehensive Care (Therapy teams) and Patient Advocate of the NSAID Avoidance with Gould Syndrome COL4A1/A2. The purpose of this document is to support the health and wellness of the patient. Gould Syndrome is a Small Vessel Disease and taking NSAIDS can lead to Stroke. This is an alphabetical list from the United States of common NSAIDS to avoid. This List has been adapted from John Hopkins and reviewed by a Professional, Licensed Pharmacist and our Medical Advisory Board. Please note, this is not an all-inclusive list of USA Medications available on the market in Summer of 2020. This is only a guide and should not be used in place of your Physician or a Pharmacists recommendation. *****Your Doctor and Medical Team need to determine what is best for your health/patient's health.****
